Project Title: House of Leaves Website

The book itself is presented as a collection of documents and files that were put together about a film and house. I want the website layout to resemble the house and maze concept possibly by organizing things in boxes. The specific pages will have a similar feeling to the collections of files, notes, and documents from the book.

Home page - A general overview of the book including short plot summary, author, and impact. It will include themes and characters.

Navidson Record - Description of the main text's layout and plot.

Truant Footnotes - Description of footnote layout and how it goes more into this character's personal life.

Whalestoe Letters - Description of the collection of letters from Truant's mom and how there is a second book including these and more content.

Format - Danielewski's process, color system, typefaces

Reception / Legacy - reviews, impact, responses, companion works (whalestoe / haunted)
